

Google Distributed Cloud Datasheets

Key benefits and technical features of Google Distributed Cloud products

[Click on datasheets in the table below to access specs](#)

Google Distributed Cloud Datasheets				
GDC air-gapped appliance	Storage services product datasheet Google Cloud Google Distributed Cloud air-gapped appliance Overview Google Distributed Cloud (GDC) air-gapped appliance is a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. The GDC air-gapped appliance is a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. Storage Datasheet			
	Platform datasheet Google Cloud Google Distributed Cloud air-gapped Racks As a glance Google Distributed Cloud (GDC) air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. The GDC air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. Platform Datasheet	Isa Datasheet Google Cloud Google Distributed Cloud air-gapped racks As a glance Google Distributed Cloud (GDC) air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. The GDC air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. IaaS Datasheet	PaaS Datasheet Google Cloud Google Distributed Cloud air-gapped racks As a glance Google Distributed Cloud (GDC) air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. The GDC air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. PaaS Datasheet	Storage services product datasheet Google Cloud Google Distributed Cloud air-gapped racks Overview Google Distributed Cloud (GDC) air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. The GDC air-gapped racks are a hardware appliance that provides a secure, air-gapped connection to Google Cloud storage services. Storage Datasheet
